SUMMARY

Full Stack Developer who completed 12 months of frontend and 5 months of backend courses (~17 months total) at Cuddy Camp IT Academy. Built production-level projects using Vue.js, React, Node.js and MongoDB. Applies professional practices including MVC architecture, Swagger API documentation and JWT authentication.

EDUCATION & COURSES

Cuddy Camp IT Academy — Tashkent

Late 2023 — May 2025

Frontend (HTML/CSS/JS/Vue.js/React) — 12 months · Backend (Node.js/Express/MongoDB) — 5 months
Completed with independent projects · ~17 months of intensive study

PDP University — Tashkent

2025 — 2030

B.Sc. Software Engineering
1st year · Entered after completing IT Academy through self-study

PROJECTS & EXPERIENCE

QR Restaurant Menu — Backend System

2024 — 2025

Real project

- Full restaurant management system with QR code — admin panel, menu management, branches
- Express.js MVC architecture: controller / router / validator / middleware / schema layers
- JWT access+refresh token auth, role-based access control (admin/superadmin), Multer file upload
- QR code generation, Swagger UI API docs, Joi validation, MongoDB Atlas — production-ready

Stack: Node.js · Express.js · MongoDB · JWT · Multer · Swagger · Joi

📄 [github.com/ibrohim088/restaram menu backend](https://github.com/ibrohim088/restaram_menu_backend)

Unicorn Hackathon — PDP University

2025

Hackathon

- PDP University hackathon — built a team MVP from scratch within 48 hours
- React.js frontend, Express.js backend, JWT auth, MongoDB, Git/GitHub team workflow
- Fast decision-making and result-driven teamwork under pressure

Stack: React.js · Express.js · MongoDB · JWT · Git

Ecology Project — Cuddy Camp & Mars IT School Hackathon

2024

Hackathon

- Inter-academy hackathon — built an ecology-focused web solution
- Environmental monitoring or ecological data analysis web app
- Rapid prototyping, teamwork and delivering a real-world solution under time pressure

Stack: Vue.js · Node.js · Express.js · MongoDB · Git

CareTrack Clinic — Clinic Management System

2025

Personal project

- Patient, doctor and appointment management platform (Vue 3 SPA)
- Node.js + MySQL REST API, multi-role access (admin / doctor / receptionist)

Stack: Vue 3 · Node.js · MySQL · Axios · Bootstrap 5 · JWT

TECHNICAL SKILLS

Frontend

HTML5 · CSS3 · JavaScript ES6+
Vue 3 · React.js · Tailwind CSS
Bootstrap 5 · Axios · Vite

Backend & DB

Node.js · Express.js · REST API
JWT · Multer · Swagger · Joi
MongoDB · MySQL

Tools & Languages

Git · GitHub · Postman · VS Code
Uzbek — Native · Russian — C1
English — A2

SOFT SKILLS

- 17 months of intensive training + ongoing self-development
- Production-level MVC architecture and layered backend design
- Team collaboration with Git workflow and pull-request process
- Swagger API documentation and strong focus on code quality
- Fast and independent learner of new technologies
